

Recombinant Human UBE2D3 Protein

Catalog No.: RP00012 **Recombinant**

Sequence Information

Species	Gene ID	Swiss Prot
Human	7323	P61077

Tags

C-His

Synonyms

E2(17)KB3;UBC4/5;UBCH5C

Product Information

Source	Purification
<i>E. coli</i>	> 95% by SDS-PAGE.

Endotoxin

< 0.1 EU/μg of the protein by LAL method.

Formulation

Lyophilized from a 0.22 μm filtered solution of PBS, pH 7.4. Contact us for customized product form or formulation.

Reconstitution

Reconstitute to a concentration of 0.1-0.5 mg/mL in sterile distilled water.

Background

The modification of proteins with ubiquitin is an important cellular mechanism for targeting abnormal or short-lived proteins for degradation. Ubiquitination involves at least three classes of enzymes: ubiquitin-activating enzymes, or E1s, ubiquitin-conjugating enzymes, or E2s, and ubiquitin-protein ligases, or E3s. This gene encodes a member of the E2 ubiquitin-conjugating enzyme family. This enzyme functions in the ubiquitination of the tumor-suppressor protein p53, which is induced by an E3 ubiquitin-protein ligase.

Basic Information

Description

Recombinant Human UBE2D3 Protein is produced by *E. coli* expression system. The target protein is expressed with sequence (Met1-Met147) of human UBE2D3 (Accession #NP_003331.1) fused with a 6xHis tag at the C-terminus.

Bio-Activity

Storage

Store the lyophilized protein at -20°C to -80 °C for long term.

After reconstitution, the protein solution is stable at -20 °C for 3 months, at 2-8 °C for up to 1 week.

Avoid repeated freeze/thaw cycles.

Validation Data

Recombinant Human UBE2D3 Protein was determined by SDS-PAGE with Coomassie Blue, showing a band at 17 kDa.
