

PolyDetector AP Blocker

RUO

Intended Use

For Research Use Only.

Summary and Explanation

The PolyDetector AP Blocker is used to block the endogenous alkaline phosphatase enzymes that naturally occur in cells and tissue sections without affecting antigens or nucleic acids.

Adding Levamisole and other similar compounds to the AP substrate-chromogen has been the traditional way of blocking endogenous alkaline phosphatase activity found in cells and tissues. Unfortunately, this approach reduces the sensitivity of most AP substrate-chromogens and does not completely block intestinal endogenous AP activity.

The PolyDetector AP Blocker blocks all types of endogenous alkaline phosphatase activity and helps to standardize immunohistochemical, immunocytochemical and in situ hybridization procedures.

Presentation

The PolyDetector AP Blocker is provided in liquid ready-to-use form.

Catalog No.	Concentration	Volume
BSB-0055-RUO	Ready-to-use	15 mL
BSB-0056-RUO	Ready-to-use	50 mL
BSB-0057-RUO	Ready-to-use	100 mL
BSB-0058-RUO	Ready-to-use	200 mL
BSB-0059-RUO	Ready-to-use	1000 mL

Storage Store at 2-8°C

Stability

This product is stable up to the expiration date on the product label.

Do not use the after expiration date listed on package label. Temperature fluctuations should be avoided. Store appropriately when not in use.

Adhere to all local laws when disposing of this product.

Precautions

1. For professional users only. Results should be interpreted by a qualified medical professional.
2. This product contains <0.1% sodium azide (NaN₃) as a preservative. Ensure proper handling procedures are used with this reagent.
3. Always wear personal protective equipment such as laboratory coat, goggles and gloves when handling reagents.
4. Dispose of unused solution with copious amount of water.
5. Do not ingest reagent. If reagent is ingested, seek medical advice immediately.
6. Avoid contact with eyes. If contact occurs, flush with large quantities of water.
7. Follow safety precautions of the heating device used for epitope retrieval (TintoRetriever Pressure Cooker or similar).
8. For additional safety information refer to Safety Data Sheet for this product.
9. For complete recommendations for handling biological specimens, please refer to the CDC document, "Guidelines for Safe Work Practices in Human and Animal Medical Diagnostic Laboratories" (see References in this document).

Preparation of Working Solution

The PolyDetector AP Blocker is a ready-to-use working solution and requires no further preparation.

Recommended Protocol

1. Deparaffinize, rehydrate tissues and perform permeabilization treatment (enzyme or heat retrieval) if necessary.
2. Wash with 3 changes of IHC wash buffer.
3. Place slides in PolyDetector AP Blocker for 5 minutes.
4. Wash with 3 changes of IHC wash buffer.
5. Continue with IHC, ICC or ISH protocol.

Abbreviated Immunohistochemical Protocol

Step	ImmunoDetector AP/HRP	PolyDetector AP/HRP	PolyDetector Plus HRP
Peroxidase/AP Blocker	5 min.	5 min.	5 min
Primary Antibody	30-60 min.	30-60 min.	30-60 min.
1st Step Detection	10 min.	30-45 min.	15 min.
2nd Step Detection	10 min.	Not Applicable	15 min.
Substrate- Chromogen	5-10 min.	5-10 min.	5-10 min.
Counterstain / Coverslip	Varies	Varies	Varies

Product Limitations

Due to inherent variability present in immunohistochemical procedures (including fixation time of tissues, dilution factor of antibody, retrieval method utilized and incubation time), optimal performance should be established through the use of positive and negative controls. Results should be interpreted by a qualified medical professional.
